PERFORMANCE NOISE CONTROL BARRIER

SILENCE THAT SPEAKS VOLUMES 

hushtecsolutions.com

H PERFORMANCE SERIES NOISE BARRIER

Hushtec Performance Barriers were designed to provide noise mitigation firstly for construction and demolition applications to provide a safer working environment and reduce noise for the convenience of those in the vicinity.

The Performance Sound Barrier solution from Hushtec reduces noise, making work areas safer for employees, while also minimising the impact on both people and animals close to the job site.

Up to 30dB noise reduction

100% customizable, any size, shape & colour

Weatherproof, for outdoor and indoor use

Velcro connected for minimal noise leakage

Tensioned eyelets for added install points

Standard size: 2m tall x 1.3m wide
(ideal for temp fence panels and scaffold)

PRODUCT CUSTOMISATION CAPABILITIES

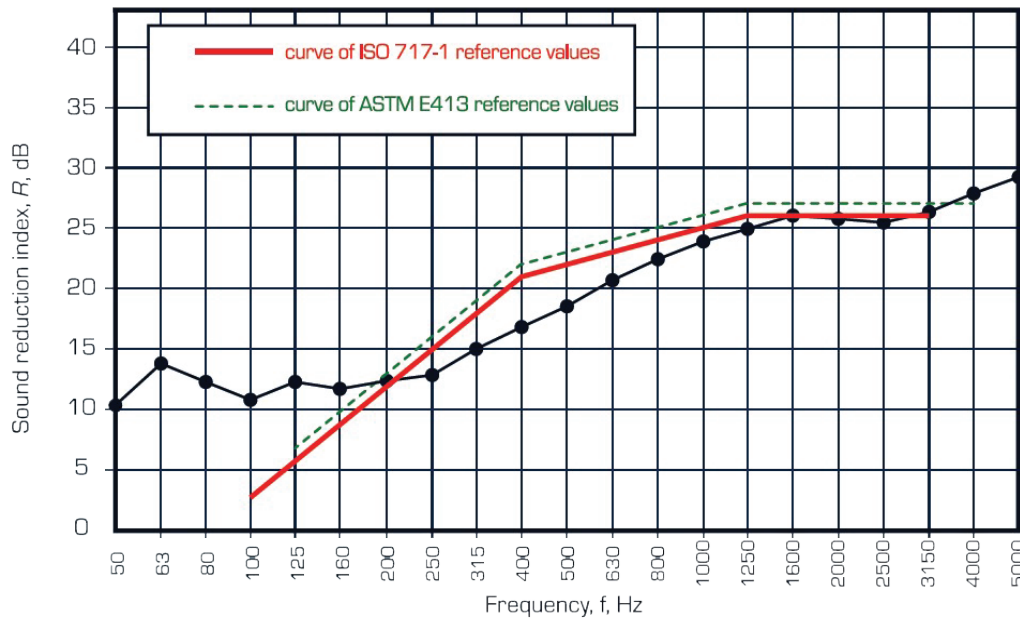

We manufacture and stock a wide range of standard products that have been designed to meet the most common requirements.

However, we also offer extensive customisation capabilities, from customising the size and shape of your solution, to applying your branding and logo.

Our Performance barriers also minimise dust, and they can double as temporary fencing, hoarding, structures, and scaffolding.

QUIETLY MAKING THE WORLD A BETTER PLACE

Significantly reduce both noise and dust on your construction or demolition site with our Performance Sound Barrier. It is suitable for outdoor or indoor use, and it is manufactured to the highest standards.

HUSHTEC[®]

Your global leader in the development and manufacturing of noise control solutions and technologies.
