# H MASS LOADED

Often referred to as “HUSHTEC ON A ROLL”, The HUSHTEC MLV & MLC is a high-performance, flexible mass-loaded vinyl & PVC noise barrier, offering exceptional acoustic transmission loss and versatility to cater to a vast range of applications and industries.

Supplied on roll form, or we can cut to size and add eyelets where required to suspend as a curtain whether it be in an industrial application sectioning off noisy machinery or used in new home builds to soundproof rooms.

The HUSHTEC Mass Loaded Clear is a high-performance noise barrier yet 100% transparent. Common uses include large floor to ceiling factory dividers in industrial applications to section of certain noisy areas without affecting the light and brightness within the building.

The HUSHTEC Mass Loaded Clear is also an integral part of our ground-breaking HUSHTEC Rock breaker attachment. The clear shroud blocks noise, dust and flying debris when chipping away concrete or breaking rock.

Frequency f Hz	R One-third octave dB
50	13.0
63	14.1
80	13.7
100	12.5
125	14.0
160	13.4
200	14.4
250	15.5
