-  Velcro connected for minimal noise leakage
-  Tensioned Eyelets for added install points
-  Standard size: 2000mm tall x 1300mm wide

THE HUSHTEC TRANSPARENT SERIES

noise barrier is our newest design and is one of the thinnest noise barriers on the market! At only 5mm thick this noise barrier still achieves incredible acoustic performance and offers exceptional durability while taking up very little room. We have developed the HUSHTEC noise barrier range from a wide selection of quality materials sourced worldwide to provide an innovative noise barrier that delivers excellent results while also being very robust and durable.

THE HUSHTEC TRANSPARENT SERIES

was inventively designed to be extremely effective, yet quick and easy to install. The barriers include the HUSHLOCK Velcro system which features 50mm joins down either side of the barrier to ensure maximum strength / protection and to gain full compliance as a clip together kit form noise barrier. We have positioned heavy duty tensioned eyelets on the top and bottom of the barrier to cater for a wide range of suspensions such as; Temporary site fencing, scaffolding, timber hoarding's and many other substrates. from site fencing, scaffolding, and timber hoardings.

Frequency f Hz	R One-third octave dB
50	13.0
